ABOUT ME

Hello, my name is Mehmet Ali and I am a software engineer. As an innovative and solution-oriented software engineer, I strive to constantly improve myself and learn. In this process, Albert Einstein's quote has been a great source of inspiration for me: "**The day you stop learning, you start dying**."

This quote motivates me every day and reminds me to strive to improve my own skills. Working in a field like software engineering, which is open to continuous learning, it is very important to adapt to change and constantly learn new things. For this reason, I try to see myself as a better version of myself than the previous day and aim to acquire new knowledge every day. I believe that each new knowledge and skill will make me a more competent software engineer and enable me to provide more effective and creative solutions in projects.

WORK EXPERIENCE

Part-Time Software Developer — 2023 - 2024

Software Engineering Department | Kırklareli University

- I took part in the development of our university's websites.
- I took part in the front-end and back-end development of the websites I worked on.
- I learned how to work with the team in projects and how to manage the concept of time and task.
- I improved my practical knowledge of software development with the projects I took part in.
- The websites I took part in the development process :
  - https://ogrkulup.klu.edu.tr
  - https://labsis.klu.edu.tr
  - https://muys.klu.edu.tr

Software Engineer Intern — 2023 - 2024

Peykan Yazılım Otomasyon ve Elektronik San. Tic. Ltd. Şti

I took part in project-based development and took part in more than one project during this job process.

- I developed desktop software with Delphi.
- I developed both web and mobile applications related to the textile industry with technologies such as **FLUTTER** (Mobile Application Development) & **PHP**, HTML, CSS, BOOTSTRAP (Website Development).

During this business process, I gained new experiences and experiences in **FLUTTER**, **PHP** and **SQL** skills by developing projects.

Turkticaret.Net & InfinityQ — 2025 - Present

Turkticaret.Net (Mobile Application Developer)

- Developed cross-platform mobile applications for iOS and Android with Flutter.

InfinityQ (Software Engineer)

- Develop AI-powered enterprise products at InfinityQ, the AI company established within Turkticaret.Net.
- Use AI-assisted development tools such as Claude Code to accelerate development, code review and refactoring.
  - https://infinityq.ai
